

ARTIFACT FROM THE FUTURE: SKILLING PASSPORT

For every paid skilling subscription for an individual or business, a Skilling Passport is generated. These passports are offered to local residents who cannot afford to pay the subscription fees at the Assistive Learning Centers. These passports interface with the online Skilling Passport Platform to keep track of skills the resident wants, and helps them develop a schedule to take their classes. It will also make suggestions for local mentor meet ups for the resident to attend. The passports aggregate data to be used for the Needs-Based Heatmaps as well.
